

- *terminator* (terminal emulator)
- *acpi* (provides battery and thermal info)
- *asunder* (audio CD ripper)
- *audacious* (music player)
- *bleachbit* (system cleaner)
- *blueman* (bluetooth management utility)
- *catfish* (file search)
- *chkrootkit* (command line utility to check for the presence of rootkits)
- *compton* (window compositing)
- *conky-all* (provides system and other info on the desktop)
- *cpufrequtils*
- *curl*
- *disk-manager* (filesystem management)
- *doublecmd-gtk* (file manager)
- *evince* (PDF reader)
- *feh* (image viewer & desktop wallpaper setting)
- *file-roller* (file compression/decompression utility)
- *firefox-esr* (web browser)
- *firmware-linux* (binary firmware for various drivers in the Linux kernel)
- *galculator* (calculator)
- *galternatives* (used to set default apps)
- *gdebi* (useful for installing .deb packages)
- *gdmapp* (graphical drive space usage)
- *gimp* (image viewer & manipulation)
- *gimp-data-extras*
- *gimp-help-xx* (where xx is your desired language; use *apt search gimp-help*)
- *gimp-plugin-registry*
- *gmrn* (app launcher)
- *gnome-keyring*¹
- *gnome-logs* (system logs viewer)
- *gnome-system-monitor* (process & system monitor)
- *gnupg2*
- *gparted* (partition manager)
- *gpview* (image viewer)
- *gtkhash* (file hash check)
- *gufw* (firewall)
- *irqbalance* (good for multi-core processors)
- *keepassxc* (password manager)
- *kleopatra* (2-factor file encryption utility)
- *lame*
- *libreoffice*²
- *libreoffice-help-xx*² (where xx is your desired language; use *apt search libreoffice-help*)
- *libunrar5* (for doublecmd-gtk)
- *lxappearance*
- *mate-polkit*
- *medit* (text editor)
- *meld* (file and directory diffing utility)
- *memtester* (memory testing utility)
- *network-manager-gnome*
- *ntp*

- *ntupdate*
- *obmenu*³
- *oxygencursors* (optional; mouse pointer eye candy)
- *pavucontrol*⁴ (volume control)
- *pnmixer* (volume control from the *Tint2* panel)
- *redshift* (optional; utility to reduce eyestrain)
- *synaptic* (useful for package search/discovery)
- *tint2* (panel)
- *ttf-adf-verana* (font)
- *vlc* (multimedia player)
- *vrms* (optional; reports installed pkgs from the *non-free* and *contrib* repo trees)
- *weather-util* (optional; weather info from the command line)
- *workrave* (optional; break reminder)
- *xfburn* (CD burner)
- *xfce4-notifyd* (system notifications)
- *xfce4-power-manager* (laptops only)
- *xorg*
- *xscreensaver* (screensaver and user session locking)
- *xserver-xorg-input-evdev*⁵
- *xserver-xorg-input-synaptics*⁵

¹ -- Should also install the *libpam-gnome-keyring* package.

² -- Install from the *_Backports repo_* if available and desired, as it will be a newer version.

³ -- Should also install the *openbox*, *obconf*, *obsession*, and *scrot* packages.

⁴ -- Should also install *pulseaudio* packages.

⁵ -- Necessary for a Synaptics trackpad (laptop), the Logitech T650 glass trackpad, or the Logitech Wireless trackpad to get tap-to-click functionality. Otherwise skip installation.
